

Keeping Wheatland Connected

Wheatland Broadband is now S&T! Beginning January 1, 2022, all Wheatland Broadband customers will receive their service from S&T. We are hard at work to upgrade the Wheatland network to faster, more reliable technology. However, customers may still purchase or upgrade their service to the existing plans until we announce new speeds. We appreciate your business and patience as we provide our customers with a robust broadband experience.

Eligible customers will be notified about any upgrade opportunities. Stay tuned. A new network is coming to Western Kansas.
